1. From the Start screen, place the mouse cursor in the bottom right corner.

2. The Charms bar appears. Click Search.

3. The Search Apps screen appears. Enter Control Panel and click the Magnifier icon.

4. Click the Control Panel link which appears on the left side of the screen.

5. The Control Panel appears. Click View Network Status and Tasks under Network and Internet.

6. The Network and Sharing Center appears. Click the Set up a new connection or network link.

7. The Set Up a Connection or Network window appears. Click Manually connect to a wireless network.
8. The **Manually connect to a wireless network** window appears. Enter the following information, and then click **Next**.
   a. **Network Name**: WA-WiFi.1x
   b. **Security Type**: WPA2-Enterprise
   c. **Encryption Type**: AES
   d. **Security Key**: Leave blank

9. The **Successfully added WA-WiFi.1x. message appears. Click Change connection settings.**

10. The WA-WiFi.1x **Wireless Network Properties** window appears. Click the **Security** tab.

11. Click the **Settings** button.

12. The **Protected EAP Properties** window appears. Uncheck both **Verify the server’s identity by validating the certificate** and **Enable Fast Reconnect**.

13. Click the **Configure** button under **Select Authentication Method**.

14. The **EAP MSCHAPv2 Properties** window appears. Verify that **Automatically use my Windows logon name and password (and domain if any)** is unchecked. Click **OK**.

15. Click **OK** to close the **Protected EAP Properties** window.
16. Click **Advanced settings** on the WA-WiFi.1x Wireless Network Properties window.

17. The **Advanced settings** window appears. Check **Specify authentication mode** and select **User authentication** from the drop-down list under **Specify authentication mode**.

18. Click the **Save credentials** button.

19. The **Windows Security** window appears. Enter your **NetID** and **NetID password**. Click **OK**.

20. Click **OK** to close the **Advanced settings** and the **WA-WiFi.1x Wireless Network Properties** windows.

21. Click **Close** when the **Manually connect to a wireless network** window appears.

22. Close the **Network and Sharing Center** window.

23. Click the **WiFi icon** on the taskbar.

24. The **Networks** screen appears. Click **WA**.

25. Check **Connect automatically** and click **Connect**.

26. The **Windows can’t verify the server’s identity** screen appears. Click **Connect**.

27. You are now connected to WA-WiFi.1x.
